SHORTE

-2-

- On the Soviet airfield at Kaliningrad were jet planes similar to the type used in 1944; these were not used, however, because the Soviets did not know how to operate them. A Soviet IL-2 type plane was seen in the air; it was a one-propeller plane selecting the German Stuka.
- There were no telephones in the houses in Sovetsk, but there was one non-dial telephone in the M. camp.
- 6. A new collulose factory had been constructed in Sovetsk.
- 7. Yalaria had been spreading in the area of Sovetsk; almost every other person was a victim of this malagr. The fever was called "Sumpf" or Swamp fever.
